

# Konftel – Audio Conference

# For Board Rooms and Meeting Rooms

### Expansion microphones

When the expansion microphones are connected to the Konftel 200 or Konftel 200/NI the range increases to 70 sq. metres, i.e. more than double the area. Each microphone has 360° sound pick-up, volume control and mute button.

### Remote control

The remote control allows you to control all the functions on your Konftel 200 or Konftel 200/NI. It also has four programmable speed dialling buttons for direct numbers.

### Tape recorder cable

You can use your tape recorder to record your meeting by connecting the tape recorder cable to your Konftel 200 or Konftel 200/NI.

### GSM/DECT-cable

Connect your GSM or DECT telephone to a Konftel 50 so that more people can join in the call.

### Wall mounting bracket

Mount your Konftel 200 or Konftel 200/NI on the wall. Remote control recommended.

Konftel 50

## On the desktop

Talk freely without a handset. Konftel 50 allows you to hold crystal clear handsfree conversations on your system telephone, GSM or DECT telephone. Can also be connected to your PC/Mac using IP telephony over the Internet.

Konftel 100

Konftel 200

Konftel 200/NI

## On the conference table

The Konftel 100 is the optimal conference phone for the smaller meeting room. The Konftel 100 has exactly the functionality required for an effective and simply executed phone meeting.

The Konftel 200 and Konftel 200/NI are powerful and flexible conference phones. They also work perfectly in larger conference rooms as they can be easily equipped with expansion microphones and a remote control.

Konftel 100 and Konftel 200 connects to an analogue (PSTN) line. Konftel 200/NI can also connect to a digital (ISDN S<sub>0</sub>) line, giving even better sound reproduction. Two options in other words!

A chance to come closer at a distance

## Intelligent communications

OmniSound™

## “We are in a meeting” has been given a new dimension

Now you can meet – in spite of the distance and a pressing schedule. Konftel makes the phone meeting a viable alternative. An opportunity to bring people together, and a chance to hold spontaneous meetings and reach instant decisions. No matter how great the distance.

Konftel is the conference phone for the new age, equipped with the unique OmniSound™ – optimal sound with the feeling of togetherness! Learn more about our company and our products at [www.konfteltech.com](http://www.konfteltech.com)

**OmniSound™** – the crystal clear sound  
Walk around your room quite freely, discussing and debating - with constant high sound quality. No irritating sound clipping, damping or echoes. OmniSound™ produces natural sound in both directions (full duplex) as well as 360° sound pick-up and reproduction. An ultra-sensitive microphone provides omnidirectional sound pick-up and three built-in surround speakers fill the room.

### On the desktop

OmniSound™

You have probably used the speaker function in your phone at some time for hands free. And you have almost certainly been dissatisfied with the sound quality. A Konftel 50 solves the problem. The Konftel 50 is equipped with OmniSound™, a unique sound technology that creates the natural phone meeting – almost like meeting face to face!

The Konftel 50 connects to your system telephone. No extra phone line is required. The accompanying switchbox simplifies switching between the handset and hands free. Or connect a headset if you prefer.

Konftel 50 is also supplied with cables for connection to your PC/Mac. Communicate handsfree with optimum sound quality using IP telephony over the Internet.

The GSM or DECT telephone can now be used for phone meetings. Connect the cable (optional) between Konftel 50 and the telephone so that more can join in the call.

### On the conference table

OmniSound™

Some meetings are shorter than others or deal with topics where it is not necessary to meet in person. A telephone meeting saves both time and money. You can quickly get back to other duties on the same day.

Konftel's unique OmniSound™ sound technology allows you to speak with several people at the same time by phone – as naturally as being in the same room.

You can add people to the meeting from any location around the world at any time by using the multi-party call function or the phone meeting service via an operator.

The discussions are made even easier if the participants can see and work in the same document via the Internet.

Konftel has three conference phones specially customised for conference rooms: Konftel 100, Konftel 200 and Konftel 200/N1.
