

More freedom with Konftel conference phones

Conference phones for every situation

Flexible solutions for different kinds of telephone meetings, an audio technology that provides a true feeling of presence, and new opportunities for business development. Konftel helps your employees to quickly and effectively meet your company's customers or partners. A more flexible way to work.

- Crystal clear sound – OmniSound®
- Natural sound – in both directions (full duplex)
- 2-year guarantee

Konftel – for every situation and occasion!

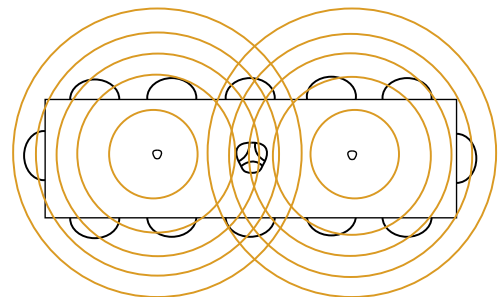

More and more people are realising the business benefits of telephone meetings. With Konftel, you can take these benefits a step further. We have solutions for many different needs:

- **In conference rooms – big or small**
- **Quick meetings at your desk**
- **In the wireless office**
- **Group meetings by the computer**

Telephone meetings in conference rooms both big and small

With Konftel, your employees are more accessible for important meetings. Thanks to simple handling and the ability to add extra microphones, we can offer models for both small and large conference rooms. Konftel's OmniSound® audio technology makes for natural sounding conversations.

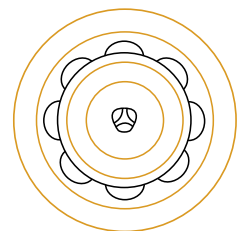

70 m²

Large conference rooms require conference telephones with greater audio coverage. If you'd like a standalone telephone on the table, then choose from the 200 series. You can even complement an existing telephone with a Konftel 60W. Equipped with extra microphones, it provides an impressive audio coverage area of 70 m².

30 m²

All our models are well suited to smaller conference rooms. The audio coverage area is 30 m² and the sound is crystal clear. Many choose the Konftel 100 standard model as a standalone unit. Both the Konftel 50 and the Konftel 60W can be connected to an existing phone.

Quick meetings at your desk

Sometimes there just isn't time to book a conference room – the meeting needs to be held directly. As it's so easy to gather employees around your desk for a quick telephone meeting, the number of Konftel phones around the world is increasing. And you don't have to gather several people around your desk to take advantage of a Konftel. Everyone that uses a handsfree phone on a daily basis can tell you just how beneficial it is. The Konftel 50 and Konftel 60W conference units can be connected to system, IP, DECT, or mobile telephones. If you need a standalone conference telephone for your office, choose one of our conference phones with a separate extension. Whichever model you select, you'll be able to have quick meetings whenever you choose.

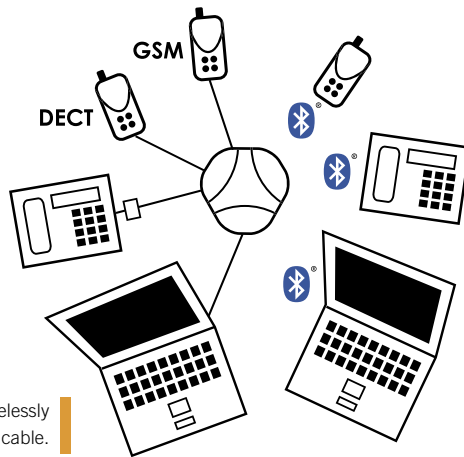

A conference solution for the wireless office

The wireless office is gaining ground. Konftel's flexible conference units improve your ability to talk handsfree. Whether your office employs a wireless mobile or DECT system, the Konftel 50 and Konftel 60W can connect to your telephones. The Konftel 200W can be connected wirelessly to DECT/GAP systems. Then everyone at the office can hold telephone meetings just about anywhere they please.

Group meetings by the computer

With the aid of a Konftel 50 or Konftel 60W, your employees can hold telephone meetings from their computers. Both units can connect to computers equipped with software for IP telephony, so-called IP Softphones. A cost-effective solution that provides perfect sound quality. Practical for those who need to keep their hands free to use the keyboard.

The Konftel 60W connects via a cable or wirelessly via Bluetooth. The Konftel 50 connects via a cable.

Which one can fulfil your needs?
